Fire-retardant washable tile Tatami	45X45 cm	Brown	TC58006

- ※ Quote and installation are required.
- ※ Supplementary components and installation costs are excluded.

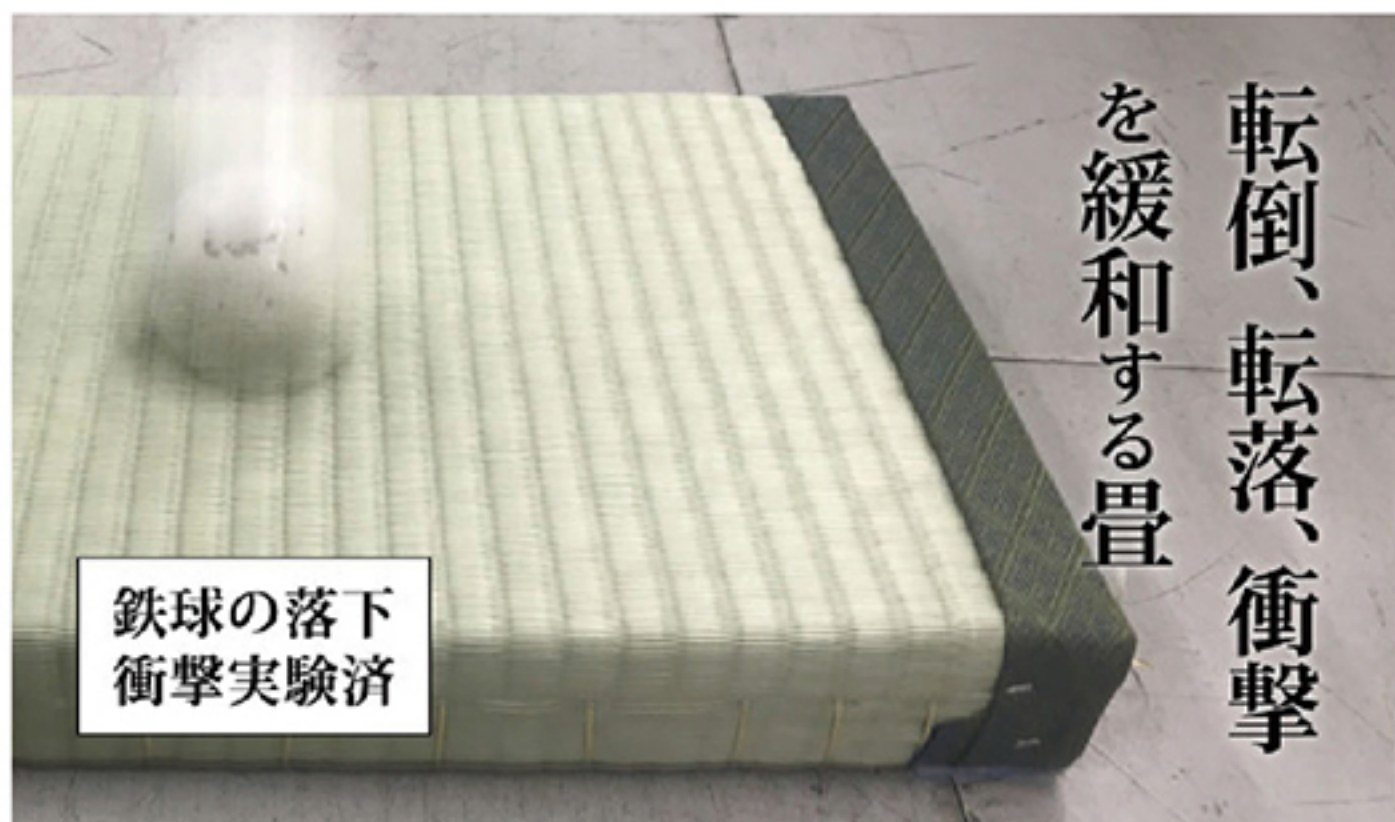

- It is hygienic because it is water resistant and can be used around water, and can be wiped with water and detergent.
- Excellent cushioning absorbs impact caused by falling objects and walking.
- As it is thin with thickness 7mm, it turns to be little step difference, so it can be used in various places.

Mitigate Shock at the time of Falling

## Buffer Tatami "NAGOMIDOKO"

Shock Absorption

Recommended / Renovation of Japanese-style House

### Mitigating shock from Falling

High resilience material is used for the core material. It mitigates the impact of falling down, falling out of bed, kneeling, etc. Hardness 35G.

### Non-Slip

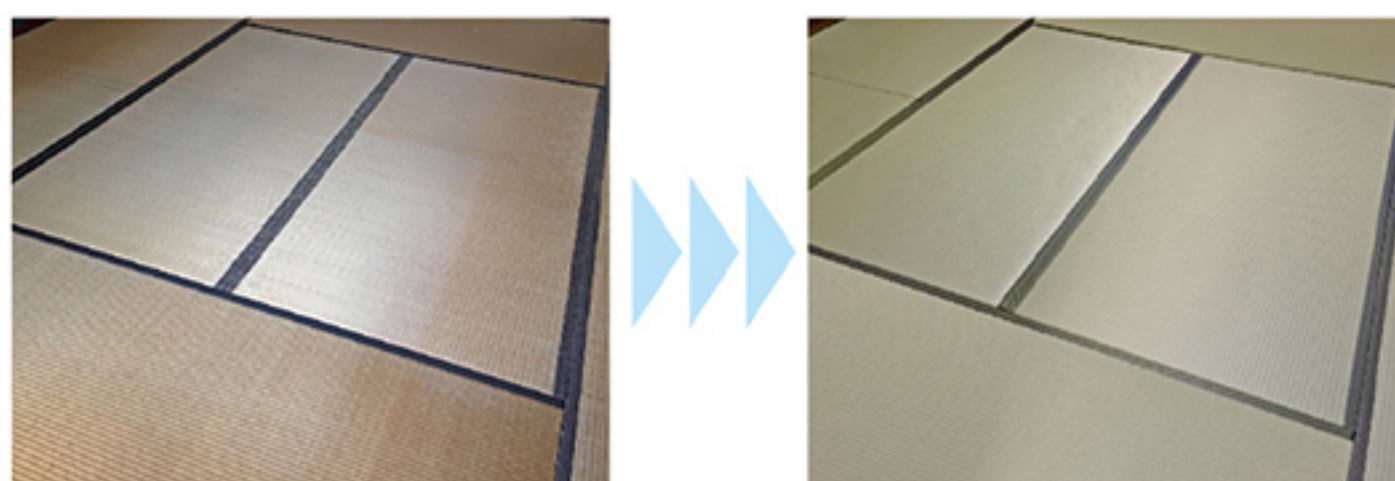

Reducing slippage by about 20% compared to conventional rush Tatami.

### Easy Cleaning

Plastic material is used for the tatami surface. Resistant to water and detergents, easy to clean and hygienic.

### Installation in a Short time

The installation is completed in a short time because it is only a replacement of the tatami mats. Measurement (about 0.5 hours) Delivery (about 1 hour)
